IMPORTANT SAFETY INFORMATION!

Read these instructions carefully before using the product.

Install Safely

- Unplug the power adaptor from the power socket during installation and follow all connection instructions.
- The power adaptor must remain easy to unplug from the power socket once the equipment is installed.
- Only connect the original power adaptor to the receiver. Other power adaptors may damage the circuitry and cause a fire risk.
- DO NOT place heavy objects on the power adaptor or receiver.
- Keep plastic packaging and small parts away from babies and children.

Prevent overheating

- Locate the power adaptor and receiver in an open, well ventilated area away from heat sources such as heaters, other electrical equipment or direct sunlight.
- DO NOT cover the receiver or power adaptor for example with curtains, cushions or tablecloths.

Protect from water

- DO NOT expose the power adaptor or receiver to rain, moisture, dripping or splashing.
- DO NOT place objects filled with liquids, such as vases or drinks, on or near the receiver or power adaptor.

General Precautions

- Keep new and used remote control batteries out of reach of children and ensure that the battery compartment is completely secure after replacing batteries. If swallowed, the battery can cause serious injury or death.
- DO NOT expose the remote control batteries to excessive heat such as fire or sunshine.
- DO NOT place naked flames such as lighted candles on or near the receiver or power adaptor.
- DO NOT remove the power adaptor cover due to risk of electric shock from live parts inside.

Equipment Care

- Unplug the power adaptor from the power socket before cleaning. Clean with a dry or slightly damp cloth.
- If the power adaptor or receiver is damaged, unplug it from the power socket and have it checked by qualified personnel before operating it any further.

Hard Drive

- DO NOT move the receiver whilst the power is on.
- DO NOT expose the receiver to intense vibration or magnetic objects, such as loud speakers, transformers etc.

Disposal

- The crossed-out wheeled bin symbol on electrical/electronic equipment, batteries or their packaging indicates that the electrical/electronic equipment or battery should not be disposed of with other household waste. They should be disposed of separately - contact the place of purchase or local authorities for details.
- Uncontrolled disposal of such waste can harm the environment and human health due to the presence of hazardous substances, so your role in preventing this is important.

1. Introduction

Thank you for purchasing your EchoStar Ultra Slim Box HDT-610R **Freeview+ HD** digital TV recorder.

The HDT-610R is a state-of-the-art high definition digital TV recorder (DTR) combining dual channel **Freeview** terrestrial digital television reception with the flexibility of personal video recording. It is the complete entertainment solution: an advanced, high definition (HD) digital TV recorder combining Freeview+ HD, digital TV recording and access to Smart TV entertainment.

- Freeview+ HD – 50 jaw dropping digital channels including 4 in HD; all subscription free.
- Watch & record TV in high definition.
- Unique design; ultra slim case & award winning on-screen guide.
- Smart TV⁺ ready; entertainment on demand* & catch-up TV.
- High capacity recording; 300 hours in SD, or up to 125 hours in HD.
- Twin Tuner; pause live TV, record two programmes at the same time or a complete series.

* On demand services are provided by third parties and may be chargeable.

+ To get Smart TV features you must connect to the Internet using your broadband router; at least 2 Mbps download speed is recommended.

About Freeview

Freeview currently offers 50 digital terrestrial TV channels with 4 channels in High Definition plus 25 radio channels including BBC and ITV. It is a subscription-free service with channels and services being added all the time.

For more information, and a complete list of channels, visit:

www.freeview.co.uk

Unpacking the Box

Carefully unpack the box and familiarise yourself with each item:

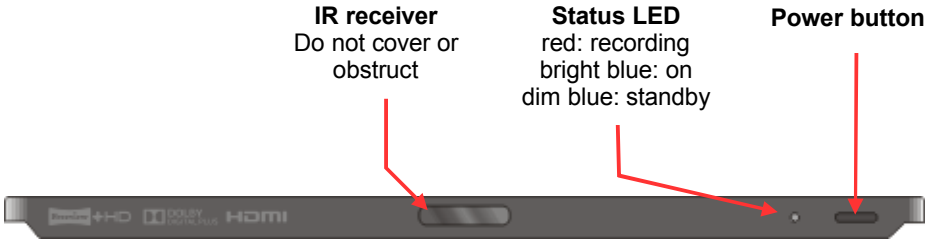

- The HDT-610R digital TV recorder
- 1 Power adaptor
- 1 HDMI cable (1.5m)
- 1 Network cable (2.0m)
- 1 Remote control (2xCR2032 batteries included)
- Digital audio adaptor
- Quick Start Guide
- Warranty Booklet

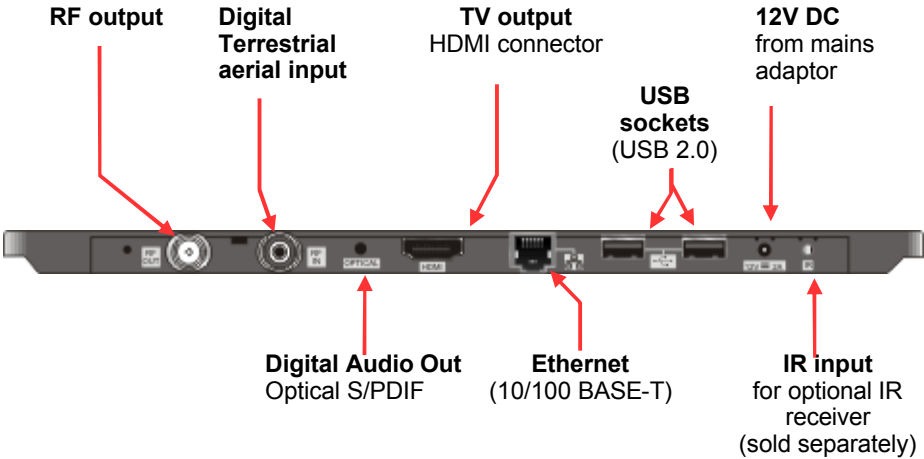

Controls and Connectors

2. Putting It All Together

This section describes the basic connections you need to operate the HDT-610R. Its rear panel has connections for audio and video equipment as well as a digital terrestrial aerial input.

You must connect your TV via the HDMI input. You can choose whether to play audio through the HDMI cable or through the digital audio output.

Digital Terrestrial Inputs

The HDT-610R is designed to use a single digital terrestrial aerial input.

Your TV aerial should be suitable for the reception of digital terrestrial signals.

Connecting to the Internet

The HDT-610R is designed to work with a wired Ethernet connection. If your router is not in the same room as your HDT-610R, you can use a pair of 'Power-line' devices (which use the home electrical wiring to carry the Ethernet signal).

Before connecting an Ethernet cable to the HDT-610R, unplug the HDT-610R from the mains. With the connection to your network in place, reconnect your HDT-610R to the mains. It may take the HDT-610R a few minutes to start up after connecting to the router for the first time.

To check your internet connection, see page 41.

Remote Control

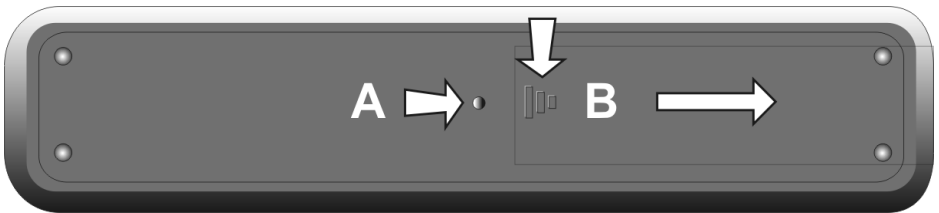

Pull and remove the battery insulator tab to activate the remote control.

Replacing the Batteries

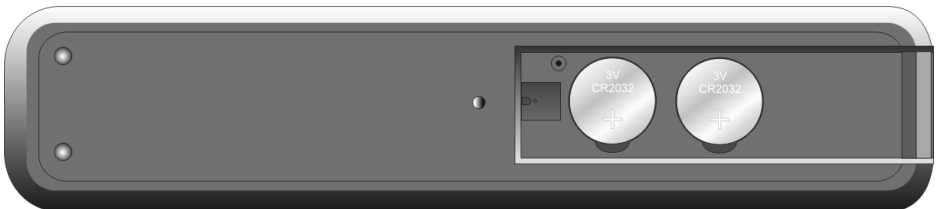

The unit displays a warning message on screen when the batteries need replacing. Also, the LED on the remote will make an additional flash after a button has been released.

The remote control is powered by two CR2032 batteries. To install new batteries:

1. Press the tip of a pointed tool such as a ball-point pen into the hole above the battery cover (A) as shown below. Press down towards the battery compartment, not in the direction of the plastic tab you can see through the hole.
2. At the same time, gently press down on the battery cover grooves and slide out the battery cover (B).

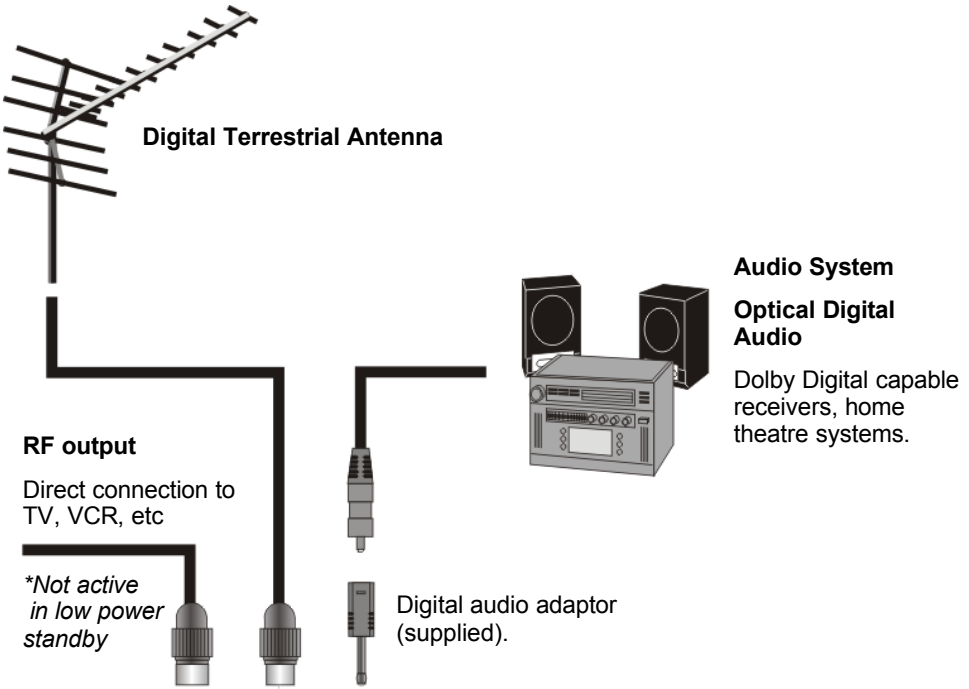

3. Remove the two CR2032 batteries and replace with new batteries. Make sure that the '+' mark on the batteries is uppermost and visible.

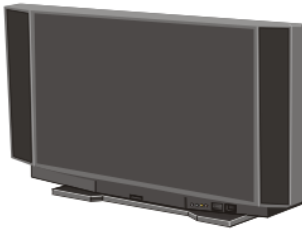

4. Replace the battery cover securely. Keep batteries out of reach of children.

Connections

TV

Connect using HDMI (cable supplied - only use good quality screened HDMI cables)

Power

Connect to 12V power supply

Internet

Connect to broadband router using supplied Ethernet cable (connection required for **catch-up TV** and **on-demand** functions)

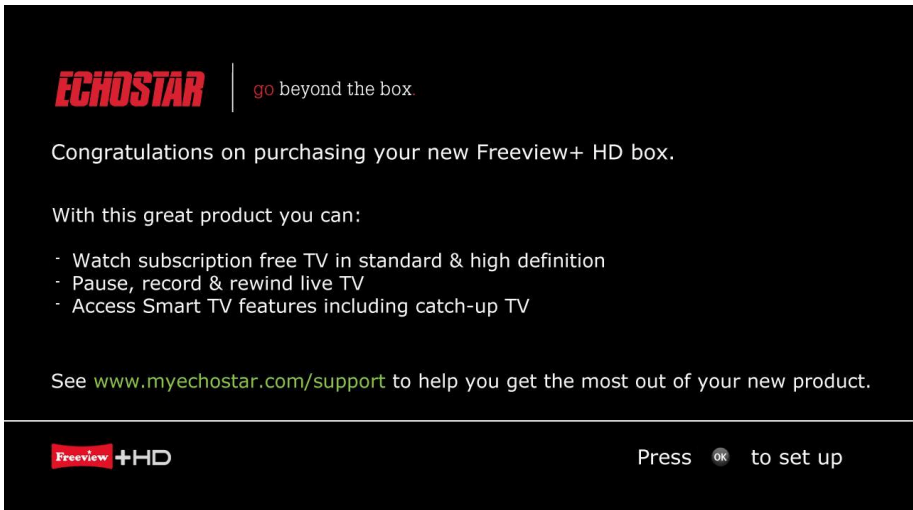

3. Getting Started

Before you switch on the power to your HDT-610R, check the following:

- Have you removed the battery insulator tab from the remote control?
- Is the unit connected correctly (see page 12)?
- Is the TV switched on?

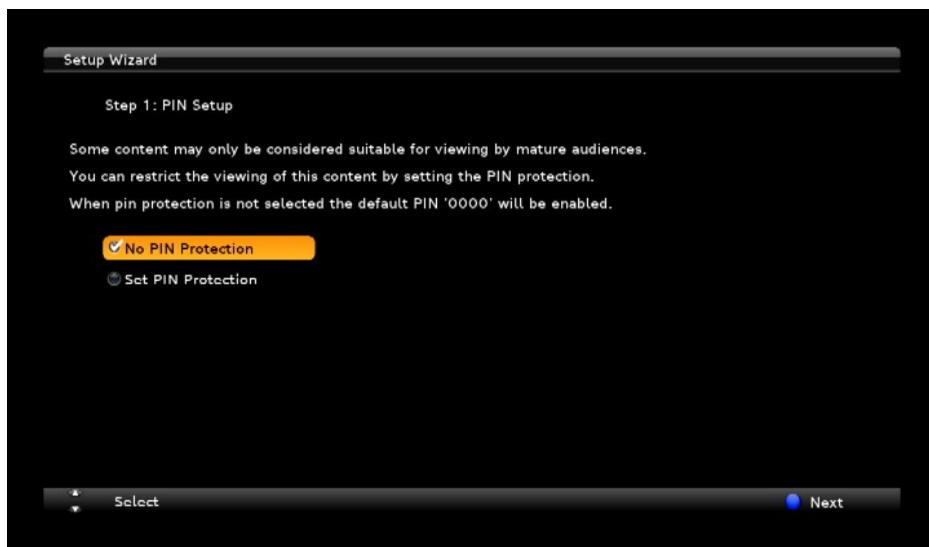

Switching on for the First Time

When you switch on your HDT-610R for the first time, it may take up to a minute for the unit to power up and display the Setup Wizard (see below). This will guide you through the process of setting up the HDT-610R and scanning for **Freeview** channels.

Follow the on-screen instructions: press **OK** to start the installation process.

STEP 1: Set the PIN (optional)

The HDT-610R now gives you the option to set a PIN code to restrict the viewing of any programmes broadcast or recorded with parental guidance advice. Before a user can view these programmes, they will need to enter the PIN code.

Tip. You can choose to enable or disable PIN protection at any time through the Settings menu (see page 40).

1. Use the menu navigation button to choose the required option:
 - No PIN Protection
 - Set PIN Protection
2. Press **OK** to accept.
3. If you select **Set PIN Protection**, use the numbered buttons on the remote to enter a PIN number.
4. Press the **BLUE** button to save the PIN.

Tip. If you don't enter a PIN, the unit will use the default code "0000". If you have forgotten your PIN, see page 40.

STEP 2: Search for Services

The HDT-610R starts a search for channels and compiles a list of the TV and Radio services it has found. The bar at the bottom of the screen indicates progress.

STEP 3: Select your region

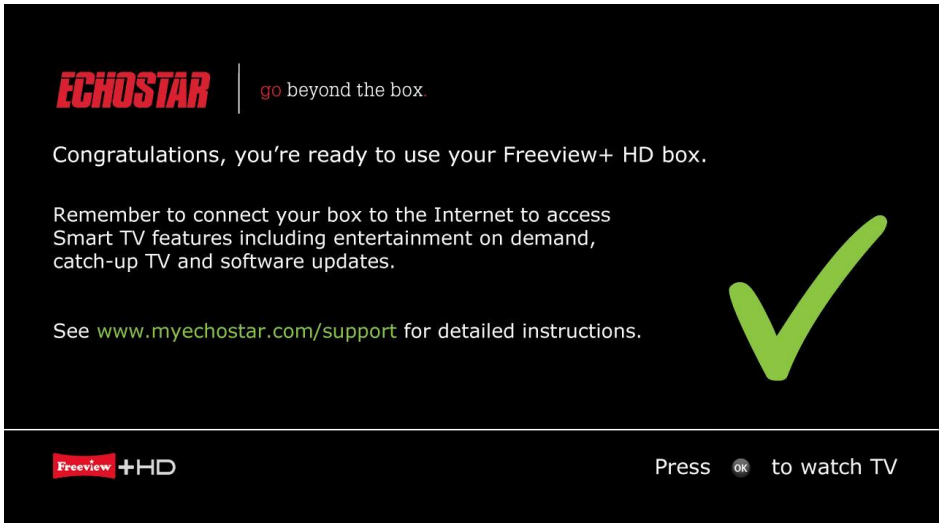

Tip. You will only see this screen if you can receive signals from more than one transmitter.

Use the menu navigation button to highlight your preferred region.

Press the **OK** button to continue.

STEP 4: Watching TV

Once the HDT-610R has successfully completed its search for channels, the screen shown above is displayed.

Press **OK** to watch TV. The unit will show the first channel in its list of detected channels.

All done!

- To learn how to set up the remote for use with your TV, go to page 18.
- To find out how to make recordings, go to page 24.
- To read about the Programme Guide, go to page 27.

Controlling your TV

The HDT-610R remote control has a number of buttons that can be used to control your TV. These are:

Volume up/down Mute TV On/Standby TV source

To be able to use these buttons, your HDT-610R's remote needs to be programmed with a 4-digit code. This identifies the correct signals for your TV. The appropriate codes for your TV. An extensive list of codes covering the majority of TV models is included at the back of this manual - see page 47.

I have the code for my TV

To program the remote:

1. Hold down both the **CH+** and **VOL-** keys simultaneously for at least 2 seconds. The blue LED gives two slow flashes to indicate successful entry into the setup mode.
2. Using the numbered keys, enter the 4 digit code within 30 seconds. The LED will flash for each entry.
3. After the fourth digit entry, the blue LED gives two slow flashes to indicate that the code has been successfully programmed.

In the event of an error, the LED gives four rapid flashes. If this occurs, you will need to repeat this process.

There are several codes for my TV

Where several codes are listed by a manufacturer, it may be necessary to repeat the above sequence with each code until the correct one is found.

Viewing

Changing Channel

You can change channel in several ways:

- Press the channel up or channel down key.
- Enter the channel number.
- Press **OK** to display the channel list and use the navigation button to select the desired channel and then press **OK** to view.
- To see a list of all available channels, press the **GUIDE** key.

Whenever you change channel, the information bar is displayed across the bottom of the screen for a few seconds.

Sound Controls

Tip. You will need to program the **VOL+/-** and **MUTE** keys to function with your TV (see page 18).

The Audio menu

Press the **AUDIO** key to view audio options. Use the arrow keys to select the required option. Press **OK**.

Muting the sound

To turn the sound off, press the **MUTE** button. To restore sound, press the **MUTE** button again or use the **VOL +/-** button.

Adjusting the volume

To adjust the sound level, use the **VOL+ /-** button on the remote.

The Information Bar

A banner is displayed across the bottom of the screen for a few seconds whenever you change channel. It shows details about the current channel and programme.

More detailed information can be displayed at any time by pressing the **i** key.

Press the navigation button up or down to view different channels.

Press the navigation button left or right to browse across the programmes scheduled for transmission on this channel.

Press the **GREEN** key to set a reminder; the unit will alert you when the program is about to start (see page 28).

Press the **BLUE** key to change the picture resolution (the current resolution is shown in the top right corner of the info bar's symbol area).

Press the **Record** button to record the highlighted programme (or stop the recording if it is already in progress).

Tip. The icons on the right hand side give you additional information about the programme (see page 63). In the example here, the icons show the display resolution (720p), the availability of multiple audio components, subtitles and text services, that the programme is part of a series, and that it is a HD transmission.

Subtitles

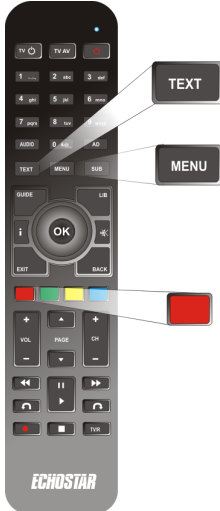

Press the **SUB** key to display the Subtitle menu.

Press the navigation button up or down to select the subtitle language. Press **OK** to select.

Tip. If you use subtitles, you won't be able to access text services at the same time. For Language selection, see page 37.

Text and Interactive Services

Some channels (BBC, ITV) offer text or interactive services. Press the **TEXT** key to display the service. These services are only available when you are watching live TV with subtitles off.

Watching catch-up and On Demand TV

catch-up TV

To access BBC iPlayer, and other catch-up TV services, your HDT-610R must be connected to a suitable broadband connection.

You can also access BBC iPlayer from some BBC channels.

1. Press the **TEXT** or **RED** button.
2. Follow the on-screen instructions to access BBC iPlayer.

On Demand TV

To access on-demand services, your HDT-610R must be connected to a suitable broadband connection.

1. Press the **MENU** button.
2. Using the navigation keys, highlight the **Apps** icon and press **OK**.
3. Using the navigation keys, select the on-demand service required and press **OK**.

If no icons are shown in the *Apps* menu then no on demand services are currently available. Check back later for updates or go to www.myechostar.com for the latest news.

Pause, Rewind and Fast Forward

When watching TV, there's no need to miss any of the action. You can pause "live" TV for up to one hour. You can rewind a programme to see a scene again and then fast forward onwards to rejoin the live action.

When you pause a programme, the unit will continue to save the output from the current channel for up to one hour. Thereafter, it will begin to play back the programme from where you left off and continue to save live transmissions.

Tip. The HDT-610R saves up to one hour of the current channel's transmissions for you to rewind and replay. This buffer is reset whenever you change channel: you can only rewind as far as the last channel change.

PLAY: resume your viewing after pausing, rewinding or fast forwarding.

FAST REWIND: rewind the programme. Repeated presses of the button doubles the rewind speed up to 64 times normal playing speed.

SKIP BACKWARD: 'rewind' the programme by 10 seconds.

PAUSE: pause playback.

FAST FORWARD: double the playing speed. Repeated presses of the button doubles the fast forward speed up to 64 times normal playing speed.

SKIP FORWARD: advance viewing by 30 seconds.

STOP: halt the current programme.

Tip. These buttons have the same functions when you are viewing recorded programmes.

Recording Programmes

Press the **Record** button to start recording the programme you are viewing.

If you want to record a different channel:

- Press the **GUIDE** button, browse to and highlight the programme you want to record (see page 29) and then press the **Record** button.
- Press the **INFO** button, browse to and highlight the programme you want to record (see page 20) and then press the **Record** button.

Press the **LIB** button to access previously recorded programmes (see page 32).

You can also access the Library (see page 32) from the main menu (see page 26).

To show that a programme is scheduled to be recorded, a  symbol is shown in the icon section (see page 63) of the Info bar and Favourites list. In the Programme Guide, the scheduled programme is highlighted in red.

If you change your mind, and want to cancel a scheduled recording:

1. Select the programme in the Programme Guide.
2. Press the **Record** button.
3. Press the red button to cancel the recording.
4. Press **OK** to confirm.

Tip. Current and future recordings are listed in the **Library** under *Scheduled Recordings* and can be edited or deleted there (see page 32).

Stopping a Recording

To cancel the recording of a live programme, press the **■** (stop) button.

Press the **OK** button to stop the recording or press the **BACK** button to dismiss the message and continue recording the programme.

Tip. To stop the recording of a future programme, select it in the guide (see page 29) or info bar (see page 20), press the Record button and then follow the on-screen prompts.

Series Linking

When you press the record button, the HDT-610R displays this message if the programme is part of a series.

To just record the selected programme:

1. Press the navigation button down to highlight *Record Just This Programme*.
2. Press **OK**.

To record the selected programme and automatically record all other programmes in the same series, simply press the **OK** button.

4. Moving On

The previous chapter described the basic use of your HDT-610R unit for watching TV and for making and viewing recordings. This section describes the onscreen Main Menu. Within the Main Menu you have access to the Programme Guide, your Favourites Lists, Library, Apps and Settings.

The Main Menu

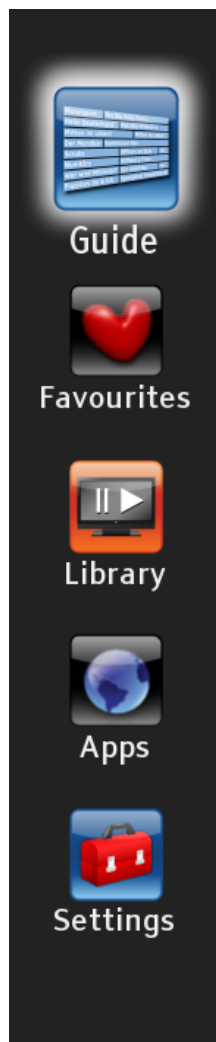

Press the **MENU** button on the remote to access the unit's advanced functions:

- Guide (see page 27)
- Favourites (see page 30)
- Library (see page 32)
- Apps (see page 36)
- Settings (see page 37)

The Main Menu bar is displayed on the left side of the screen. To navigate the main menu and its sub-menus, use the navigation button on the remote to highlight the option you want and press the **OK** button to select it.

Press the **EXIT** button to hide the Main Menu bar.

Using the Guide

The Guide lists all the channels you can view and has programme details for up to 7 days. You can use the guide to select your current viewing channel, to record another programme or to schedule future recordings.

Press the **GUIDE** key.

Press the navigation button up or down to select the channel of interest and then left or right to view current and future program details.

Press the **OK** key to view a highlighted program (if it is currently being broadcast). If the program is not currently being broadcast, pressing the **OK** button will set a reminder (see below).

Press the **EXIT** key to return to your current program.

The **RED, GREEN, YELLOW** and **BLUE** keys can be used to move the guide information forward or back by 2.5 hours or 1 day at a time.

Tip. When in normal TV viewing mode, use the TV/Radio key to toggle between radio and TV services.

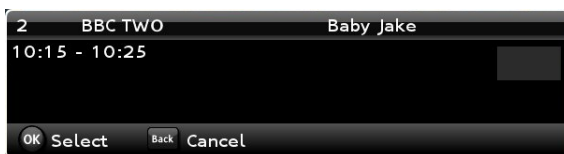

Setting Reminders

You can set a reminder from the Info bar (see page 20) or from the Guide (see above). When you do so, the HDT-610R will alert you two minutes before the programme is scheduled to start so you can switch channels or record the programme. Unless you cancel the alert, it will remain on screen until two minutes after the scheduled start time.

Programmes with a reminder set are highlighted in green in the programme guide and have a green circle in the symbols area of the guide and info bar (see page 63).

Dealing with a reminder

- Press **OK** to switch channels and view the programme.
- Press the **BACK** button to dismiss the reminder and continue with your viewing.

Using Programme Information

Within a channel list, use the navigation button to select the channel of interest and highlight programmes. Information about the programme is provided by the information icons (see page 63).

Use the coloured buttons to move the guide information forward or back by 2.5 hrs (a full screen) or 1 day at a time:

RED Move guide back by 2.5 hours (not available for programmes already broadcast).

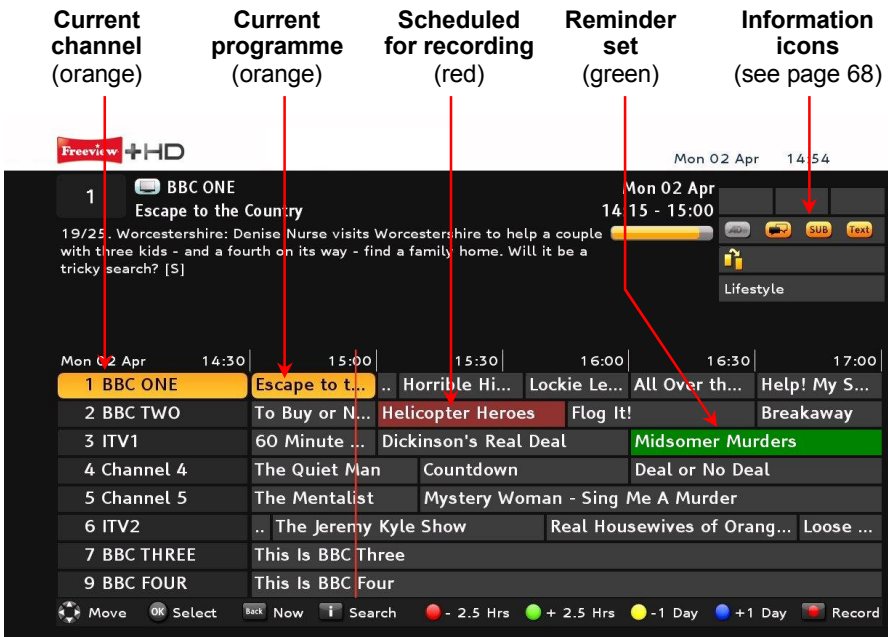

GREEN Move guide forward by 2.5 hours (a full screen).

YELLOW Move guide back by 1 day (not available for programmes already broadcast).

BLUE Move guide forward by 1 day.

Press **OK** to set a reminder for the highlighted programme.

Press the **Record** button to record the highlighted programme (or to stop a recording if it is already scheduled or in progress).

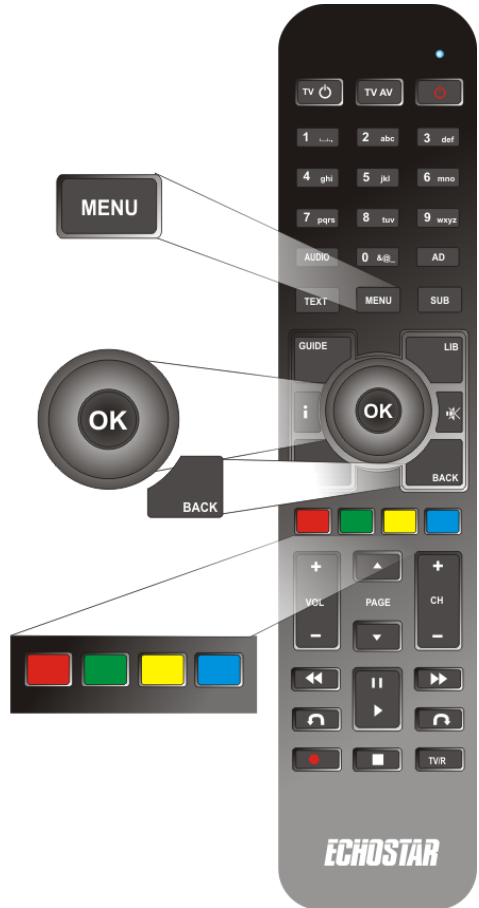

Favourites

freeview provides you with access to over 50 TV channels. Finding your usual viewing channels in the Guide listings can therefore be difficult and time-consuming. To make channel selection easier, you can create up to four Favourites lists: reduced listings showing just those channels that you watch regularly.

To select or edit a Favourites list:

1. Press the **Main Menu** button.
2. Use the navigation button to highlight **FAVOURITES** and then press **OK**.
3. Use the navigation button to highlight the Favourites list you want to set up or edit: lists are named Favourites 1, 2, 3 or 4. By default, the Favourites feature is turned off.
4. Choose one of the following options:
 - To set-up or edit the selected list, press the **YELLOW** button. Go to section *Editing a Favourites List* on page 31.
 - To change the name of the selected favourite list, press the **GREEN** button. Go to *Renaming a Favourites List* on page 31.
 - To select an existing favourites list press the **OK** button. If the list has been set up, the unit enables it for channel selection. If the list is empty, a status message is displayed; press the **OK** button again to continue.
 - To clear the selected list, click on the **RED** button.

Use the **CH** buttons (see page 19) or the Information bar (see page 20) to select channels from within an active Favourites list.

Editing a Favourites List

From the Favourites menu (see page 30), press the **YELLOW** button to create or edit the selected *Favourites* list. Press the **TV/RADIO** key on the remote to toggle between radio and TV services.

Adding channels

To add a channel to the selected Favourites list, select it in the left-hand list using the navigation button and then press **OK**. Repeat the procedure to add further channels to the list.

Deleting channels

To delete a channel, select it in the Favourites list and then press the **RED** button.

Renaming a Favourites List

From the Favourites menu (see page 30), press the **GREEN** button to change the name of the selected Favourites list. You can use the numeric keys to enter your text in multi-tap style or, alternatively, press the **YELLOW** button to use a virtual keyboard.

- In multi-tap style, press the **BLUE** button to switch to capital letters.
- In virtual keyboard mode, press the **BLUE** button to switch to symbols.

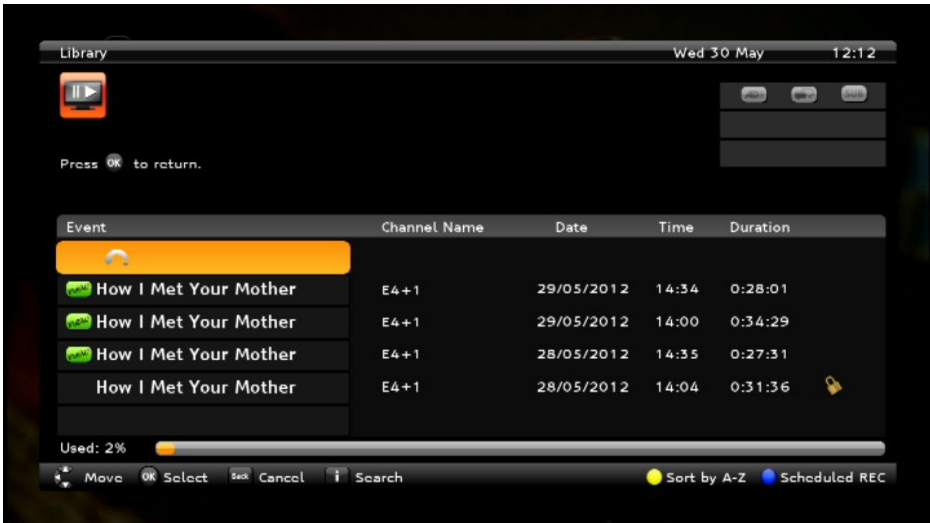

Press the **GREEN** button to save the new name or the **BACK** button to discard any changes and revert to the original name.

Using the Library

The Library stores your recorded programmes and information about future recording events (timers). You can access the **Library** from the Main Menu or directly by pressing the **LIB** key on the remote control. To help you manage your recordings and timers, the Library has three views:

- **Library:** lists all your completed and saved recordings.
- **Scheduled Recordings:** a list of pending timers.
- **Daily Schedule:** a history of your programme recording activities.

You can cycle between the *Library*, *Scheduled Recording* and *Daily Schedule* views by pressing the **BLUE** key.

Tip. Your HDT-610R is fitted with a 500GB hard drive with a capacity to record about 125 hours of HD programmes or 300 hours of SD programmes. In the lower left corner of the *Library* screen the HDT-610R displays the percentage of the drive currently occupied by recorded programmes.

Playing a recorded programme

Use the navigation button to highlight the recording you want to view and press **OK**. If you have viewed the recorded programme previously you can choose to resume viewing or restart from the beginning of the recording.

At the end of the recording the *Library* menu is re-displayed.

Sorting the Library

You can list Library programmes either in time order, with the most recently recorded programmes at the top of the list, or alphabetically. Press the **YELLOW** key to switch between the two arrangements.

Deleting a recording or folder

Recorded programmes remain in the Library until you manually delete them using this procedure. You can delete individual programmes or a complete series of programmes stored in a folder.

1. Select the recording or folder you want to delete using the navigation button.
2. Press the **RED** button.
3. Press the **OK** button to confirm or **BACK** to cancel.

Options

With a library programme selected, press the **GREEN** button to view the *Options* menu. This allows you to change a selected programme's 'New' status, its displayed name, or to apply PIN protection.

Renaming a programme

1. Select the programme in the Library list. Press the **GREEN** button.
2. Use the navigation button to select *Rename*. Press the **OK** button.
3. Use the *multi-tap entry method* screen to enter a new name.
4. Press the **GREEN** button to save the new name or the **BACK** button to discard any changes and revert to the original name.

Locking/unlocking recordings

1. Select the programme in the Library list. Press the **GREEN** button.
2. Use the navigation button to select *Lock*. Press the **OK** button.
3. If the recording has previously been locked, you will need to enter the password to unlock it.

Changing the New status

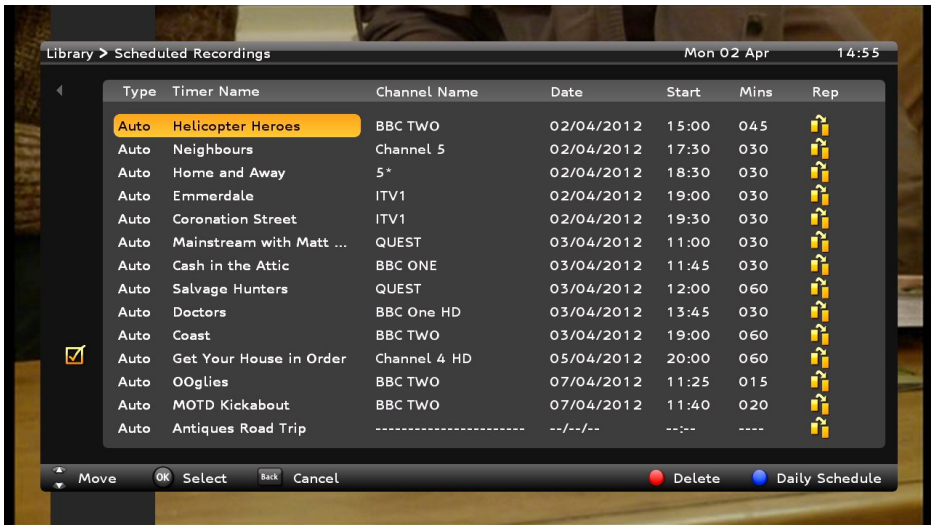

A 'New' icon is automatically displayed alongside a library recording until you watch it for the first time. Through the Options menu, you can also change the status of any recording to display or hide the 'New' icon:

1. Select the programme in the Library list. Press the **GREEN** button.
2. Use the navigation button to select *New status*. Press the **OK** button.
3. Change the status to *ON* to display the 'New' icon alongside the recording or *OFF* to remove it.

Managing Scheduled Recordings

From the *Library* view, press the **BLUE** button to switch to *Scheduled Recordings*. This lists current and future recordings.

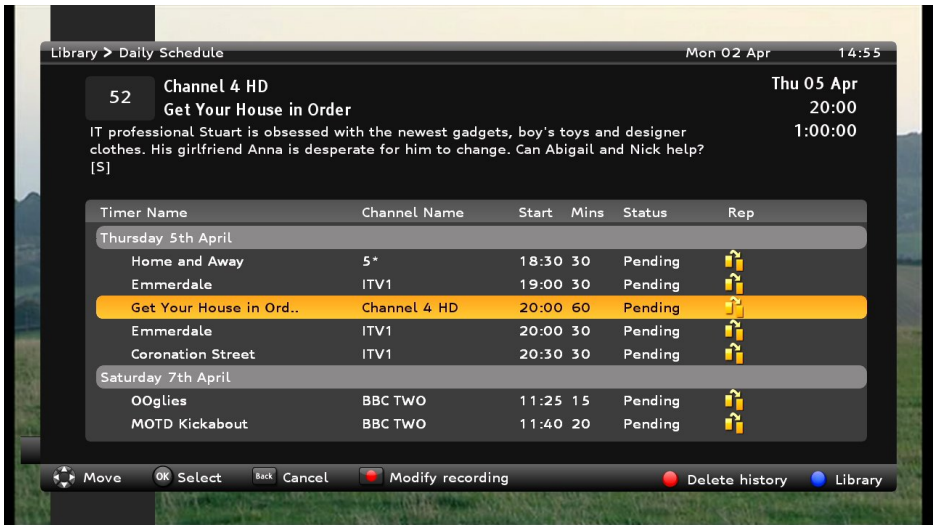

Deleting a scheduled recording

To delete a scheduled recording (a timer):

1. Select the listing to be deleted using the navigation button.
2. Press the **RED** button to delete an existing timer.
3. Press **OK** to save settings.

The Daily Schedule

From the *Scheduled Recordings* view, press the **BLUE** button to switch to the *Daily Schedule*. This logs information about your recording events. If a recording has not completed successfully, you will find information here that may explain the problem. For example, a recording may have been cancelled because of a channel clash.

Modifying a Recording

The Daily Schedule allows you to modify any pending timer events. For example, you can choose to record alternative airings of a programme. To modify the recording:

1. Use the navigation button to select the programme (timer) name.
2. Press the **Record** button.
3. Choose from the displayed options: delete the timer event or move it to an alternative showing of the programme (if available).

Deleting the Daily Schedule history

Over time, the Daily Schedule list may become large and difficult to use. Press the **RED** button to clear the history and restart the list.

Using Apps

The Apps menu is reserved for future Internet-based Smart TV services. Apps will be added to this menu automatically as they become available as part of HDT-610R software updates (see page 43).

To get Smart TV features, you must connect to the Internet using your broadband router; at least 2 Mbps download speed is recommended. Some Smart TV services are provided by third parties and may therefore be chargeable.

5. Settings

The *Settings* menu allows you to configure the unit and to set personal preferences. Use the navigation button to highlight items. Press the **OK** key to choose an option.

Note. In the following tables, a setting marked by a * symbol is the default factory setting.

The *Settings* menu categories are:

- **Languages**
- **TV, Audio & Library Setup**
- **Parental Control**
- **User Preferences**
- **Network Setup**
- **Power Options**
- **Technical Info**
- **Tuning**
- **Factory Reset**

Languages

The *Languages* menu allows you to choose the primary options for *Subtitles*, *Data Services* (digital interactive services) & *Primary Audio*:

Subtitles	<i>Off*</i> <i>English</i> <i>Welsh</i> <i>Gaelic</i>
Data Service	<i>Off</i> <i>English*</i> <i>Welsh</i> <i>Gaelic</i>
Primary Audio	<i>English*</i> <i>Welsh</i> <i>Gaelic</i> <i>Irish</i>
Audio Description	<i>Off*</i> <i>On</i>

TV, Audio & Library Setup

The *TV, Audio & Library* menu allows you to select the correct display and audio outputs to suit your TV and to set up the Library settings for the recording and playback of programmes. The following table lists the options. Please visit www.myechostar.com/support if you need any help.

Category	Menu	Sub-menu	Options

	Check for disk errors	Performs a disk check – WARNING, this may take several hours and you will not be able to watch TV or record during this process	
Screen-saver			Off On*

Parental Control

This menu allows you to safeguard your children from unsuitable programmes by restricting their access to certain channels, content or features. Parental Control relies on you creating and applying a secure PIN code to channels or programmes. It should be memorable for you, but not for your children, and you should change it regularly.

Tip: If you forget your PIN then use “2846” to gain access and set a new PIN immediately.

The Parental Control menu options are as follows:

Change PIN	Choose this option to enter and confirm a new PIN.
Service Locks	<p>Apply PIN protection to one or more channels.</p> <p>Use the arrow keys to highlight the channel you want to lock; then press the OK button.</p> <p><i>Tip: use the Page Up/Page Down keys to step through the guide.</i></p> <p>If you want to watch a locked channel, press the RED button and enter the PIN code.</p>
Pin Protection	<p>Protect all recorded programmes which carry a guidance notice. If an attempt is made to play such a recording before the 9pm watershed, the viewer is prompted to enter the PIN code.</p> <p><i>PIN Required</i> <i>PIN Not Required*</i></p>
IP Pin Protection	<p>Choose PIN protection settings for content accessed via the Internet</p> <p><i>Required for everything</i> <i>Guidance programmes only</i> <i>Not Required*</i></p>

User Preferences

Use this menu to change the appearance of text in the settings menus.

Transparency	<i>Solid</i> (Menu background is opaque but clearer) <i>Low</i> <i>Medium*</i> <i>High</i> (Menu backgrounds are fully transparent)
---------------------	--

Network Setup

This menu can be used to view and configure network settings.

Internet Interactive Content	On*/Off
Internet Connectivity	On*/Off
Wired Connection Settings	In most cases, <i>Auto Setup</i> will correctly configure your network and internet connection via a local DHCP server or DHCP-enable router. If you encounter any networking problems, visit www.myechostar.com/support . It may be necessary to disable <i>Auto Setup</i> to configure the connection manually. Unless this is the case, or you are an experienced with network configurations, you are not recommended to change this setting.

Power Options

Power-saving settings can be configured using this menu. Options allow you to select the power consumption in standby mode.

Power Mode Power saving mode used when unit enters standby:	<i>Low power standby*</i> Lowest power consumption but the receiver will take longer to switch to the active or ON state. <i>Normal power standby</i> Faster switching on; higher power consumption.
Inactivity Standby	Define time period before the receiver goes into standby if no remote control or front panel keys are operated: <i>Off, 4 Hours*, 5 Hours, 6 Hours</i>

Technical Information

This menu displays software version and other technical information.

Tuning

Services	Lists all channels.
Manual scan	Carry out a manual scan for services by setting <i>UHF channel, Frequency, bandwidth, System type</i> (advanced users only)

Factory Reset

Choose this option to restore the default configuration settings or when you need to retune or have moved house and need to perform the installation again.

Note. In addition to removing all your personal settings, this will cancel any scheduled recordings. Existing recordings are not affected and previously saved content will not be deleted.

6. Getting Help

Updates

Your HDT-610R can be updated in three ways:

- Automatically, over the air via the TV signal.
- Automatically, over your Internet connection.
- Manually: download the update from www.myechostar.com/support, saving it onto a memory stick and then applying it yourself.

Over the Air Updates

Over the Air (OTA) updates, with new channel and transmission information, are provided by **freeview** from time to time. The HDT-610R receives these automatically. A pop-up message will be displayed on screen when an update is available.

Internet Software Updates

From time to time, EchoStar will issue software updates. When a new version of the HDT-610R software is available, a pop-up message is displayed on screen. Follow the instructions to download and install the update (requires an active Internet connection).

Manual Software Update

You can manually update the HDT-610R by following the steps below:

1. Visit www.myechostar.com/support to locate the latest software.
2. Copy the update file to an empty USB memory stick.
3. Insert the USB memory stick into either the front or rear USB ports (see page 8). The screen will display a message confirming that the USB memory stick has been detected and shows the version number of the software update.
4. The HDT-610R will reset.
5. The updating process may take up to 5 minutes. When it is complete, the HDT-610R will automatically restart.

FAQs

If you can't find a solution to a problem here, please visit:

www.myechostar.com/support

No lights on HDT-610R; it doesn't switch on

- Check that the mains power adaptor is plugged in and the power socket is switched ON.
- Try a different power socket.
- Check the fuse.

No TV picture

- Check that the HDT-610R is plugged in, switched on and has had sufficient time to boot up.
- Make sure the HDT-610R is not in Standby (you can bring the unit out of standby by pressing the button on the front of the unit).
- Ensure the HDMI cable is firmly connected to the unit and to the TV.
- Ensure that the aerial cable is firmly connected to the unit and is in good condition.
- Ensure that the TV is set up with the HDT-610R and is not configured to receive input from an external device such as a DVD Player.
- Check that the TV is switched on and that the brightness level is set correctly.
- Try changing channel: the selected channel may be off air.

No sound

- Ensure the AV cable (either HDMI or Digital Audio plus adaptor) is firmly connected to the unit and to the TV.
- Check the volume level of your TV or Audio/Theatre System (if connected).
- Check that the HDT-610R, TV or Audio/Theatre System are not set to MUTE.

Poor picture or sound quality

- Ensure that the aerial is of the correct type for digital terrestrial receptions and is installed correctly.
- Picture quality may be affected by damage to the cable from the aerial.
- Check that the aerial input cable is connected properly.
- Try another channel; the problem may be due to a transmission fault.

The remote control doesn't work

- Ensure that you are holding the remote control correctly with the lens at the top of

the control pointing at the HDT-610R.

- Ensure that the IR window on the HDT-610R (see page 8) is not covered by, for example, papers and that the remote is within range.
- Does the LED at the top of the remote control light up when you press any button? Has the battery insulator tab been removed?
- Check that the batteries have charge and are in good condition. Try removing and replacing the batteries making sure they are inserted in the correct orientation (see page 11).
- Replace the batteries with a new set (see page 11).

The remote doesn't control the TV or change the volume

- You need to ensure your remote control is set-up correctly to control your TV. – see page 18. This will be necessary whenever you change the batteries.

The HDT-610R didn't record a programme

- Check that the aerial cable is connected.
- Check that your hard disk has sufficient space for further recordings (see page 39). To make space, delete some old recordings that you have already viewed.
- The unit should tell you if your scheduled recordings use more resources than the product can support – check the scheduled recording (see page 41) and make changes if necessary.
- Did the unit have power when the programme is scheduled to be transmitted? The HDT-610R will wake from standby to record a programme but it must have power to be able to do this.

iPlayer isn't available

- Check that your HDT-610R is connected to your router and that the Ethernet cables are firmly inserted at both ends.
- Check there is a broadband connection available by looking at the network settings (see page 41). Can you access the Internet from other devices?
- Check to make sure you are meeting the system requirements to use iPlayer by visiting the help section at www.bbc.co.uk/iplayer/.
- If you are experiencing issues with connecting and using BBC iPlayer, visit www.myechostar.com/support.

On Demand App doesn't work

- Check that your HDT-610R is connected to your router and that the Ethernet cables are firmly inserted at both ends.
- Check there is a broadband connection available by looking at the network settings (see page 41). Can you access the Internet from other devices?
- Try accessing the BBC iPlayer on your HDT-610R to verify your internet connection.
- Contact your Internet Service Provider if there is a problem.
- If you are experiencing issues with connecting and using the On Demand services, visit www.myechostar.com/support.

No channels found during installation

- Contact your aerial installer if there is no signal and you are satisfied that the connection to the unit is sound.

Contacting Customer Support

For the latest product information, technical support, downloads and updates please visit:

www.myechostar.com/support

or call our Customer Helpline on 0845 123 3003.

7. Remote Control TV Codes

Search the table in this section for your TV manufacturer. Make a note of the control code (or codes) used by the manufacturer. Use the procedure described on page 18 to program your remote control:

If the manufacturer of your TV is not listed, or the specified code does not work use the following procedure to scan through all programmed remote codes.

1. Switch your TV on.
2. Point the remote at the TV. Hold down both the CH+ and VOL- simultaneously (see above) for at least 2 seconds. The blue LED gives two slow flashes to indicate successful entry into setup mode.
3. Press . The blue LED is turned on.
4. Press  repeatedly until the TV switches off.
5. Press . The blue LED gives two slow flashes to indicate that the code has been stored successfully.

If your TV does not turn off then it is not supported in the remote's database.
