

19" LCD TV

Model: S19/4, S19/6

USER GUIDE

WARNINGS

Thank you for purchasing this television. For your safety, please take time to read these instructions carefully in order to familiarise yourself with the operation of the appliance and the important safety information. We strongly recommend that this product is installed by a competent person. If in doubt, refer to the retailer or the manufacturer helpline.

Caution

This television contains no user serviceable parts. Please refer to the manufacturer or authorised repair agent in the event of malfunction. Do not remove the back cover from the television.

Warning

To reduce the risk of fire, electric shock or damage to the television, do not expose it to dust, rain or moisture, or place any objects filled with liquids on or near the television.

Do not place the television in a confined space, ensure that nothing can obstruct the ventilation openings at the rear of the television.

Do not place naked flames on or near the television.

Dispose of this television and any components including batteries in an environmentally friendly manner. If in doubt, please contact your local authority for details of recycling.

Your LCD TV should be cleaned using a dry or slightly damp cloth. You should not use an alcohol based cleaner

Safety

For your safety, this appliance is fitted with a fused moulded 3 pin mains plug. Should the fuse need to be replaced, ensure that any replacement is of the same amperage and approved with the BSI mark. (⚡)

Never try and replace the mains plug unless you have adequate qualifications and are legally authorised to do so. In the event that a replacement Mains cable is required, contact the manufacturer for a suitable replacement.

Never use the television if it is damaged in any way.

Always place the television on a flat level surface avoiding anywhere which may be subject to strong vibration. Ensure the television is not placed on top of the power cable as the weight of the television may damage the cable and cause a safety hazard.

Never place mobile phones, speakers or any other device which may cause magnetic or radio interference with the television. If interference is apparent, move the device causing the interference away from the television.

Packaging

Please save the packaging for the television as you will need this in the event of warranty/service repair or support. We are unable to carry out warranty/service if you are unable to package it correctly. The safest way to package your item in the event of warranty/service repair is in its original box/packaging

WARNINGS

Screen Burn

A characteristic of Plasma and LCD TV Panels is that displaying the same image for along time may cause a permanent after-image to remain on the screen. This is called screen burn. Most pictures shown on your TV will be constantly moving and fill the screen.

Examples of images that you need to watch out for are as follows (this is not an all-inclusive list):

- **TV Channel Logos: e.g. Shopping channel logos and pricing displays-especially if they are bright and stationary. Moving or low-contrast graphics are less likely to cause ageing of the screen.**
- **Picture-in-Picture and Multi Picture-in-Picture: Do not view for long periods of time using the Picture-in-Picture or Multi Picture-in-Picture functions.**
- **Time Displays**
- **Teletext: Do not view a stationary page for long periods of time.**
- **TV/DVD Menus: e.g. Listings of DVD disk content.**
- **Pause Mode: Do not leave the TV in pause mode for long periods of time, e.g. When watching DVDs or videos.**

Note: To prevent screen burn if viewing any of the above for long periods of time, reduce contrast and brightness when viewing. Once burn-in occurs it will never disappear completely.

How do I dispose of this product?

UK: Waste electrical products should not be disposed of with household waste. Separate disposal facilities exist. For your nearest facilities, please see www.recycle-more.co.uk or instore for details.

ROI: Produced after 13th August 2005. Waste electrical products should not be disposed of with household waste. Please recycle where facilities exist. Check with your Local Authority or retailer for recycling advice.

GETTING STARTED - INCLUDED ACCESSORIES

Accessories

Included with this TV are the following accessories:

1x - User Guide Book

1x - Remote control

1x - RF lead

2x - AAA batteries

1x - AC mains lead

1x - Transformer

Please save your packaging as you will need this in the event of warranty/service repair or support. We are unable to carry out warranty/service if you are unable to package it correctly. The safest way to package your item in the event of warranty/service repair is in it's original box/packaging.

GETTING STARTED - INITIAL SET UP

TUNING IN DIGITAL TV

IMPORTANT — Please ensure the TV has reached room temperature before connecting the power for the first time

- 1) Connect the mains lead to your electrical outlet and connect the power adaptor to the television.

- 2) Connect the RF Cable supplied to the **'DVB-RF IN'** on the rear of the TV and connect the other end of the cable to your TV Aerial outlet

- 3) Install batteries in the remote control and press the [POWER] button to turn on the TV.

The 'Initial Set up-DVBT/Freeview TV' menu should now appear. If it does not, please go to step 4b.

4a) Once you have read the on screen message and checked that you have connected the RF cable to the **'DVB-RF In'** on the rear of the TV, press [OK] on the remote control whilst 'OK' is highlighted on screen.

Auto tune will now take place and set up is complete.

If you do not see the above screen to tune in the channels:-

4b) Ensure the TV is in DVB mode (press AV/TV on remote control and select DVB) Press the button labelled 'NICAM' on remote control to access settings menu, Scroll to 'Channel Search' and press OK.

Important - Due to signal strength variations across the UK for Digital TV, please note that not all of the channels/service may be available in your region.

Over the coming months as coverage increases, more services and channels may become available. Every few months, follow point 4b to re-scan for new channels/services,

In the event of poor reception in either Analogue TV or Digital TV (DVB) it may be necessary to install a signal 'booster' to enhance reception. For Digital/Freeview TV (DVB) you may need to upgrade your aerial to a High Gain Digital version.

GETTING STARTED - INITIAL SET UP

TUNING IN ANALOGUE TV

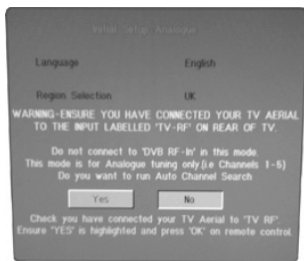

IMPORTANT — If not have Digital TV (Freeview) in your area or wish to tune in via the analogue signal please follow as below.

- 1) Connect the RF Cable supplied to the 'TV RF' on the rear of the TV and connect the other end of the cable to your TV Aerial outlet

- 2) Ensure TV is in 'TV' mode. To select TV mode, press [AV/TV], then scroll to TV and press [OK].

The initial Set up screen will appear as below

- 3) Once you have read the on screen message and checked that you have connected the RF cable to the 'TV RF' on the rear of the TV, ensure 'Yes' is highlighted and press [OK].

The TV channels will now tune in. After a few minutes, tuning in will finish and the TV will go into 'Program Edit' mode where you can move channels to the desired positions.

- 4) Scroll to select the channel you would like to move/swap, then press the red button at the bottom of the remote control.

Then, move to the location you would like to move it to.

Press [OK].

Repeat the process with all channels.

To rename the channels, refer to page 20.

Press [MENU] to exit.

Press [BLUE/CYAN] to lock the selected channel
Enter the pin code and then press [OK]
3) Press [DVB MENU] twice to exit

Create/Edit Favourite List

- 1) Press [DVB MENU]
- 2) Press [V] to select favourite list
- 3) Press [OK]

You can create favourite lists for up to 5 users

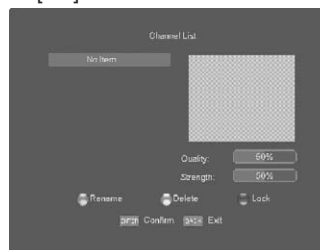

- 4) Press [V] or [^] to select the station you wish to add.
It will be highlighted in orange.
- 5) Press [OK] to add
Repeat this process until you have added all the channels you want
You can store up to 100 stations in the favourite list
- 6) Press [RED] to move the next Favourite list.
- 7) Press [DVB MENU] twice to exit

To use the favourite list. Press [FAV] and select the list you require to use.

Search for New Channels

Every so often new channels are launched on digital.
You can search for these as follows.

- 1) Press [DVB MENU]
- 2) Press [V] twice to select Channel Search
- 3) Press [OK]

- 4) Press [OK] to start search
When it has finished it will return to digital TV
- 5) Press [DVB MENU] twice to exit.

DVB-T CHANNEL SETTINGS & ADJUSTING THE PICTURE FORMAT / SIZE

System Settings

- 1) Press [DVB MENU]
- 2) Press [V] 3 times to select System Settings
- 3) Press [OK]

On Screen Display Transparency

Press [OK] and then [>] to increase or [<] to decrease the transparency

First Time Installation

Press [V] to highlight First Time Installation, Press [OK]. You will then be prompted on screen. Press [<] to highlight OK and then press [OK]

System Info

You may be asked by a service engineer which version of software your TV has.

Press [V] twice
Press [OK]

Change Pin Code

Press [V] 3 times
Press [OK]
Enter old pin code
(default is 888888)
Enter new pin code
Enter again
Press [OK] to confirm

- 4) After you have finished with this menu press [DVB MENU] twice to exit menu

Software version will now be displayed on screen.

Picture Size / Format

Your television has been factory set to show the correct picture format depending on the signal being received by the broadcast TV station.

If you wish to change the picture format.

- 1) Press [DVB MENU]

The following menu will be displayed

- 2) Press [V] 5 times to select Picture Settings
- 3) Press [OK] to select

- 4) Press [<] or [>] to select either 4:3 or 16:9
- 5) Press [OK] to accept settings
- 6) Press [DVB MENU] twice to exit.

TV MODE MENU OPERATION

 - a) Press the page you require using the number buttons i.e. page 302, by pressing [3][0][2]
 - b) Press the colour buttons, these will take you to page indicated on screen for each colour
 - c) Press [PGDN] or [PGUP] these will take you to next page. i.e. if you are on page 150 and you press [PGDN] the page will switch to 149
- 3) To exit Teletext press [TEXT] at any time

Other buttons

[SIZE] this increases or decreases the size of the text on screen
 [INDEX] some pages are more than one page long this button displays the number of pages
 [REVEAL] if there is an answer or something hidden this will display it
 [SUBPAGE] displays the sub page if it exists

CONNECTING TO A PC - WINDOWS XP

IMPORTANT— Before connecting to a PC you must ensure that the settings of the PC's output are correct for the new LCD Monitor.

You need to do the following with your old monitor connected

- 1) Switch on your PC
- 2) When finished booting up, right click your mouse anywhere on the screen, this screen will appear

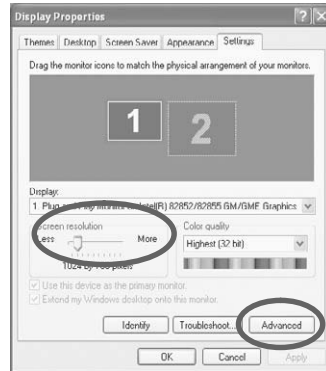

- 3) Left click your mouse on Properties, this screen will appear

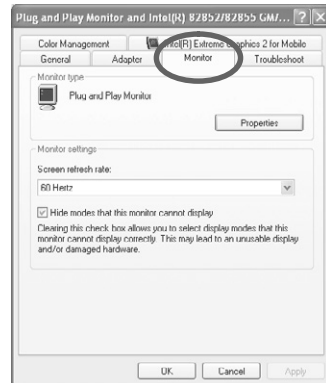

For Vista operating system the process is very similar to the above. If you require additional support please contact the helpline.

- 4) Left mouse click on Settings, this screen will appear. Check the Screen Resolution is set to 1024 by 768 pixels, if it is not change to this.

- 5) Left mouse click on Advance, this screen will appear, click on tab called 'monitor'

- 6) Left click on the drop down for Screen refresh rate and select 60 Hertz.
- 7) Finally click Apply, then click Yes and the settings will be saved.
- 8) Turn off your PC.
- 9) Connect up your LCD TV to your PC and switch on.

WALL MOUNTING

IMPORTANT— BEFORE DRILLING ANY HOLES IN THE WALL ENSURE YOU ARE NOT DRILLING WHERE THERE COULD BE ANY ELECTRIC WIRES, WATER OR GAS PIPES

THIS TV REQUIRES A VESA
100 WALL MOUNT, OR EQUIVALENT

100

To remove the stand

- 1) Remove the four screws from the base of the stand
- 2) Remove the two screws highlight below

- 3) Now gently remove the plastic cover.

Wall Mounting the TV.

- 1) Remove the four screws highlighted below.
- 2) The wall mount can now be easily connected to the mounting holes on the rear of the TV. These holes are indicated in the picture below

Important - Ensure the length of Screws securing the Wall Mount to the TV do not exceed 10 mm. Using longer screws could cause irreparable damage to the TV.

USING WITH SKY DIGITAL

You may wish to use your TV with a Sky Digital Remote Control.

There are a number of connection options, the best being connecting via SCART cable.

Connecting Via SCART

- 1) Connect the SCART cable from the Sky Digital Box to SCART of the TV
- 2) Press [AV/TV]
- 3) Press [V] or [^] to select SCART
- 4) Press [OK]

The channel your Sky Digital box is displaying will now be shown on the TV.

You may wish to share your Sky Digital signal around the home by using an RF connection. If this TV is to be connected in this way, please follow the below.

Connecting Via RF

Ensure the Sky signal is switched on, before you start the below.

- 1) Connect the RF cable from the RF output socket of the sky/cable box to the 'TV RF' of the TV.
- 2) Press [MENU] to enter menu
- 3) Press [>] 3 times to select Tuning Menu
- 4) Press [V] 3 times to select Manual Tune

- 5) Press [OK] to enter menu
- 6) Press [>] to select the channel you require your Sky on. Please select a channel not in use i.e. channel 6.
- 7) Press [V] twice so Start Search in highlight
- 8) Press [OK] to start search.

Manually tune until you locate the Sky channel. If it stops press [OK] again and search will continue. (Often, the required is 847.25 mhz, depending on which model of Sky Set top box)

- 9) Once tuned in press [MENU] 3 times to exit

USING WITH SKY DIGITAL REMOTE CONTROL (BSkyB)

You may wish to use your Sky Digital remote control to operate the channels and sound functions of this TV. For this you require a 'code' that needs to be programmed into your Sky Digital remote control.

At the point of manufacture, BSKyB have not launched the code required for this model of TV, however, you can check our website for updates when codes are released.
